

Fleet Sites Note

Three of the sites put forward as part of the Call for Sites process were to improve tourist facilities, although in one case there was also an option to include some residential housing.

For that reason, this latter one (FL11) has been included in the site assessment process, but the remaining two have been treated separately and assessed for tourist purposes only with the aim of enhancing existing camping facilities and infrastructure as part of a year-round camping offer.

Proposed improvements suggested by the landowner include additional camping space, eco lodges, improving roads, providing additional staff accommodation units and recreation units, as well as further improvements to farm facilities.
